State and federal hazardous waste laws limit the use of this type of hazardous waste collection program to those businesses that generate less than 100 kilograms (27 gallons or 220 pounds) of hazardous waste per month. Businesses that generate more than this amount are required by law to use a licensed hazardous waste hauler to manifest and transport their waste. Therefore, in order to participate in this program, you must sign this document claiming that you are a Very Small Quantity Generator. We reserve the right to review your annual manifests or consult with the County Environmental Health Department to determine your eligibility for use of this program.
